

IMAGETREND® LICENSE MANAGEMENT

Modernize your licensing and certification process to minimize administrative burden and maximize applicant output. ImageTrend's License Management solution applies automation to your credentialing workflow for a more efficient system. Transform your state or agency's licensing practice from paper to a full-service, online platform that can be accessed anywhere at any time.

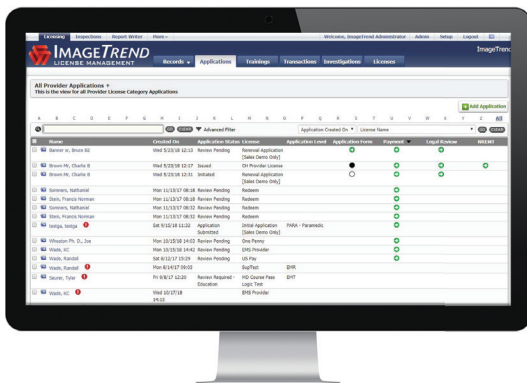

A COMPREHENSIVE SOLUTION

Getting Started and Beyond

At the heart of the solution is a streamlined experience to the credentialed professional application and renewal process. We provide an end-to-end solution that reduces the licensing burden on your staff with regulatory complaint automated processes, integrated monitoring and robust communications tools. As a secure cloud-based provider, we take care of maintaining the solution, allowing your team to focus on your operations and organizational goals.

Partnership

We offer a licensing workshop which is provided by our licensing professionals who work with your team to provide ideas and education that crafts a path from your current approach to a solution that optimizes the value to your organization. No matter where you are in the decision process, the ideas we share will provide an expanded view of the value that a comprehensive solution will provide. *Below is an example of the user interface.*
