ELITE VAX™

COVID-19 Vaccination Data Collection Solution – Ready to Deploy

ImageTrend Elite Vax™ provides a comprehensive COVID-19 vaccination data collection solution that is ready for immediate deployment. Elite Vax is a stand-alone module and has been developed for nation-wide success in standardizing the process for tracking COVID-19 vaccinations, providing efficient and universal patient documentation for all providers and locations.

Intuitive and Easy to Use

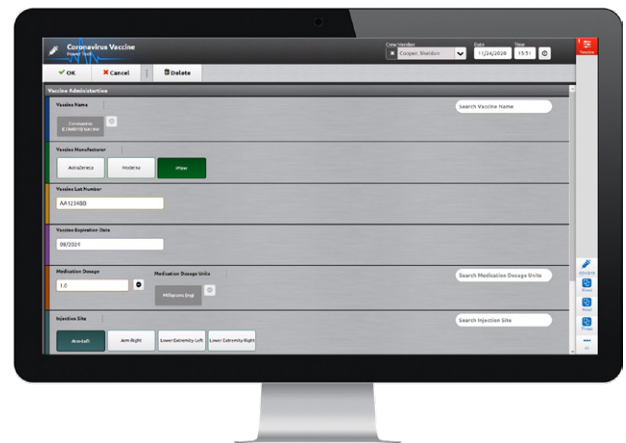

Elite Vax is ready to go, collecting vaccine administrative data with or without an internet connection. Data entry can also be streamlined by scanning government-issued ID cards including driver's licenses to auto populate data fields. There are no installs needed and it works on a variety of devices from tablets to PCs. Electronically capture vaccine questionnaire and consent signatures or quickly upload from paper by camera or scanner. To meet the needs of all communities, there are limitless consent languages available.

Reporting and Analytics

Advanced reporting and analytics are ready to monitor vaccination rates, keeping all stakeholders and communities informed.

Data Access and Sharing

Secure, cloud-based data repository, can accommodate all of your data needs and requests for authorized external access. Sharing data with external stakeholders such as your county, state, or federal level organizations, such as the Center for Disease Control's Immunization Information System (IIS), has never been easier.

CMS Invoicing & Submission

ImageTrend completes the solution with billing submission to the Centers for Medicare & Medicaid Services (CMS) with a dedicated Revenue Services team. This offers the complete solution from documentation to vaccine revenue recovery for all participating organizations from the first vaccine to follow-up boosters.
