

COLLABORATE™

The EMS and healthcare industries are full of underutilized data that can be used to make a lasting, positive impact on our communities. ImageTrend Collaborate™ aggregates, de-identifies and securely displays your data to empower data driven decision-making, lead industry advancements and contribute to research.

Reach Higher Levels of Awareness

Collaborate brings together de-identified data to reach higher levels of awareness, including:

SPREAD OF PUBLIC HEALTH ISSUES AND EPIDEMICS

Examples:
Opioid Crisis, Influenza, COVID-19, At-risk Populations and Vaping Related Illness/Injury

TRENDS

Examples:
Call Volume, Dispatch Reasons, Personal Protective Equipment (PPE) Usage, Incident Dispositions and Patient Outcomes

ESTABLISHED BENCHMARKS

Examples:
Ambulance Patient Offload Times (APOT), EMS Compass, National EMS Quality Alliance (NEMSQA) Quality Measures and Core Measures

ImageTrend Clinical & Research Services Team

As your organization takes part in the Collaborate program, ImageTrend's Clinical and Research Services Team will be available to provide additional analysis on multiple topics related to your organization and the industry as a whole.

Collaborate provides insight into clinical, operational and public health data that will contribute to healthcare provided by organizations, specific sectors and the industry at large. We will dive into research topics like pediatrics, community paramedicine, critical care, opioids, violence, trauma, and other urgent topics affecting communities.

Visual Insight

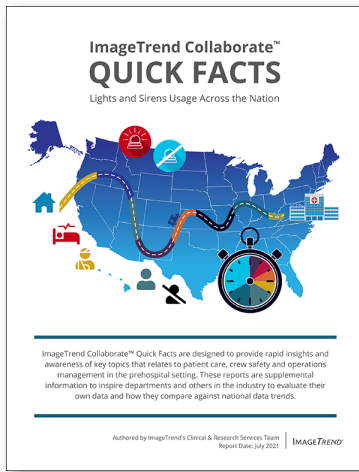

Your state or organization will be contributing to advancing prehospital care and healthcare at large, to improve patient handling and outcomes. Research is valuable for all, but this is only possible through a collaborative effort. Welcome to Collaborate.
