

# CLINICAL DOCUMENT ARCHITECTURE (CDA) EXCHANGE

## Seamless Hospital Data Integration

Welcome to ImageTrend's Clinical Document Architecture (CDA) Exchange solution. Our CDA Exchange offers a streamlined approach for connecting hospital systems with EMS, ensuring efficient and bidirectional data exchange to improve patient outcomes and administrative workflows.

### Optimize Workflow Efficiency

Adopting ImageTrend's CDA Exchange maximizes workflow efficiencies and eases administrative burdens. Our solution eliminates the need for repeated phone calls, printing, faxing, scanning, and manual data entry, providing a seamless integration experience.

### Key Benefits

- **Improved Efficiency:** Securely obtain the information needed without taxing operational staff, eliminating the need for faxing.
- **Streamlined Workflows:** Reduce or eliminate follow-up calls and tasks as partners can leverage ImageTrend CDA Exchange for document queries.
- **Administrative Relief:** Staff no longer need to hunt for information to fax over. Instead, they can rely on a trusted framework to perform accurate and secure data queries.

### Implementation Process

Implementing ImageTrend's CDA Exchange is straightforward and efficient. Our collaboration with Epic ensures a smooth and hassle-free adoption process, with minimal technical setup typically taking just minutes or hours.

### Contact Your Epic TS

Reach out to your Epic TS and reference SLG: 7157434. Note that this SLG is an internal document for Epic TS staff members and won't be found in Epic's Sherlock or Galaxy documentation systems. Your Epic TS will guide you through enabling automated, secure data exchange with ImageTrend CDA Exchange.
